National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table A. Summary of Stock Status for FSSI Stocks

Jurisdiction	FMP	Stock	Overfishing? (Is Fishing Mortality above Threshold?)	Overfished? (Is Biomass below Threshold?)	Approaching Overfished	Management Action Required	Rebuilding Program Progress	B/B _{MSY}	Points
WPFMC	Mariana Archipelago Ecosystem	Guam Bottomfish Multi-species Complex *	No	Yes	NA	Rebuilding Program	NA	0.58	2
WPFMC	Mariana Archipelago Ecosystem	Northern Mariana Islands Bottomfish Multi-species Complex *	No	No	No	NA	NA	1.08	4

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table B. Endnotes for FSSI Stocks

Jurisdiction	Stock	Endnotes
GMFMC	Gray triggerfish - Gulf of Mexico	This is the second rebuilding plan. The first plan was implemented in 2008 and the stock was targeted to rebuild by 2013 (6-year plan). In 2012, the plan was extended by 5 years with a target rebuild date of 2017, but the stock failed to rebuild. A new 9-year plan was approved in 2017, but wasn't implemented until 2018 with a target year of 2025 to rebuild, so it is regarded as an 8-year plan.
GMFMC	Greater amberjack - Gulf of Mexico	This is the third rebuilding plan. The first rebuilding plan was implemented in 2003 and the stock was targeted to rebuild by 2009 (7-year plan). This plan was later extended by 3 years to rebuild by 2012 (10-year plan), but the stock failed to rebuild. A new rebuilding plan was adopted in 2015 (but not implemented until 2016) with a target rebuild date of 2018 (3-year plan). A 2016 assessment showed the stock would not rebuild by this date, so a new 10-year plan was developed in 2017 with a target rebuild date of 2027. This plan was implemented in 2018.
GMFMC	Red snapper - Gulf of Mexico	This is the second rebuilding plan. The first rebuilding plan was implemented in 1990 and the stock was targeted to rebuild by 2000 (10-year plan). In 1991 the plan was extended to rebuild by 2007 (17-year plan). In 1993, it was extended again to rebuild by 2009 (19-year plan) and in 1996, extended to rebuild by 2019 (29-year plan), but the stock failed to rebuild. A new 31-year rebuilding plan was scheduled for implementation in 2001 with a target rebuild date of 2032. This plan was not implemented until 2005 so is regarded as a 28-year rebuilding plan.
GMFMC	Tilefish - Gulf of Mexico	The most recent assessment for tilefish - Gulf of Mexico (2011) used overfished criteria that have been determined to be the Best Scientific Information Available (BSIA), but have not yet been formally implemented in the fishery management plan. An upcoming amendment to the fishery management plan will formally establish the criteria for tilefish and other data poor stocks.
GMFMC	Yellowedge grouper - Gulf of Mexico	The most recent assessment for yellowedge grouper - Gulf of Mexico (2010) used overfished criteria that have been determined to be the Best Scientific Information Available (BSIA), but have not yet been formally implemented in the fishery management plan. Amendment 44 will formally establish the criteria for yellowedge grouper and other data poor stocks.
MAFMC	Bluefish - Atlantic Coast	The Mid-Atlantic Fishery Management Council (MAFMC) was notified on November 11, 2019 that this stock is overfished. The MAFMC has two years from this date to implement a rebuilding plan for bluefish.
MAFMC	Northern shortfin squid - Northwestern Atlantic Coast	Although Northern shortfin squid is currently listed as not subject to overfishing, the most recent stock assessment (2006) was not able to precisely determine current exploitation rates or stock biomass. Nevertheless, the overfishing status of this stock remains unchanged, based on the results of an earlier assessment (2005).
NEFMC	Atlantic herring - Northwestern Atlantic Coast	The New England Fishery Management Council (NEFMC) was notified on October 13, 2020 that this stock is overfished. The NEFMC has two years from this date to implement a rebuilding plan for Atlantic herring.
NEFMC	Atlantic cod - Georges Bank	The status of Georges Bank cod is based on the results of the stock assessment completed in 2013. The stock assessment conducted in 2015 was rejected, but indicators continued to support the determination that the stock is overfished; overfishing status is less clear. Plan B assessments were conducted in 2017 and 2019, but were not used to support overfishing or overfished stock status determinations.
NEFMC	Atlantic cod - Gulf of Maine	This is the second rebuilding plan. The first rebuilding plan was implemented in 2004 and the stock was targeted to rebuild by 2014 (10-year rebuilding plan). A new 10-year plan was implemented in 2014 and the stock is targeted to rebuild by 2024.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table B. Endnotes for FSSI Stocks

Jurisdiction	Stock	Endnotes
NEFMC	Atlantic halibut - Northwestern Atlantic Coast	The status of Atlantic halibut is based on the results of the stock assessment completed in 2012. Although the stock assessment conducted in 2015 was rejected, reviewers felt confident that the stock remains overfished. First and second derivative assessments were conducted in 2018, 2019, and 2020 but were not used to support overfishing or overfished stock status determinations.
NEFMC	Red hake - Southern Georges Bank / Mid- Atlantic	The New England Fishery Management Council (NEFMC) was notified on January 9, 2018 that this stock is overfished. The NEFMC has two years from this date to implement a rebuilding plan for red hake.
NEFMC	White hake - Gulf of Maine / Georges Bank	This stock is making progress towards rebuilding, but did not rebuild by the target end date of 2012. Rebuilding measures will remain in place until the stock rebuilds.
NEFMC	Winter flounder - Georges Bank	The status of Georges Bank winter flounder is based on the results of the stock assessment completed in 2019. A stock assessment was conducted in 2020 and results will be used to support stock status when Framework Adjustment 61 is approved. The rebuilding plan for Georges Bank winter flounder was implemented in 2010 and the stock was targeted to rebuild by 2017. In 2017, the stock was determined to be no longer overfished (still rebuilding), but projections indicated the stock was approaching an overfished condition because the stock was projected to decrease in the next two years. As a proactive measure, the rebuilding plan was revised and the stock is expected to rebuild by 2029.
NEFMC	Winter flounder - Southern New England / Mid-Atlantic	The status of Georges Bank winter flounder is based on the results of the stock assessment completed in 2019. A stock assessment was conducted in 2020 and results will be used to support stock status when Framework Adjustment 61 is approved. The first rebuilding plan for Southern New England /Mid-Atlantic winter flounder was implemented in 2004 and the stock was targeted to rebuild by 2014 (10-year rebuilding plan). A new 10-year plan was implemented in 2013 and the stock is targeted to rebuild by 2023.
NEFMC	Witch flounder - Northwestern Atlantic Coast	This is the second rebuilding plan. The first rebuilding plan was implemented in 2010 and targeted to rebuild by 2017, but the stock failed to rebuild under the first plan. A new benchmark assessment finalized in 2017 rejected the model previously used to support stock status (VPA model), as well as a new model that was attempted (ASAP model). As a result, there were unreliable indicators to recommend overfishing status so the overfishing status is now unknown. There are no reliable numerical estimates of stock size, but the conclusion that the stock is at historically low levels and other indicators support maintaining the stock as overfished. Update assessments finalized in late 2017 and 2019 support the same results as the benchmark assessment finalized in early 2017.
NEFMC	Yellowtail flounder - Southern New England / Mid-Atlantic	Southern New England / Mid-Atlantic yellowtail flounder was previously rebuilt in 2012 under a rebuilding plan. This stock was declared overfished again in 2017 and a new 10-year rebuilding plan was implemented in 2019.
NEFMC / MAFMC	Goosefish - Gulf of Maine / Northern Georges Bank	The status of Gulf of Maine/Northern Georges Bank goosefish is based on the 2013 stock assessment. A Plan B Smooth assessment was conducted in 2016 and 2019 to support catch advice, but was not used to support stock status.
NEFMC / MAFMC	Goosefish - Southern Georges Bank / Mid- Atlantic	The status of Southern Georges Bank/Mid-Atlantic goosefish is based on the 2013 stock assessment. A Plan B Smooth assessment was conducted in 2016 and 2019 to support catch advice, but was not used to support stock status.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table B. Endnotes for FSSI Stocks

Jurisdiction	Stock	Endnotes
NPFMC	Golden king crab - Aleutian Islands	The status of this stock is based on the assessment of two stocks - Eastern and Western Aleutian Islands golden king crab stocks.
NPFMC	Bering Sea / Aleutian Islands Flathead Sole Complex	Bering Sea / Aleutian Islands Flathead Sole Complex consists of Flathead Sole and Bering Flounder. Flathead Sole accounts for the overwhelming majority of the biomass and is regarded as the indicator species for the complex. The overfished determination is based on the combined abundance estimates for the two species; the overfishing determination is based on the OFL, which is computed from the combined abundance estimates for the two species.
NPFMC	Bering Sea / Aleutian Islands Rock Sole Complex	Rock Sole Complex consists of Northern Rock Sole and Rock Sole (NOTE: These are two distinct species, not two separate stocks of the same species). Northern Rock Sole accounts for the overwhelming majority of the biomass and is regarded as the indicator species for the complex. The overfished determination is based on the combined abundance estimates for the two species; the overfishing determination is based on the OFL, which is computed from the combined abundance estimates for the two species.
NPFMC	Bering Sea / Aleutian Islands Skate Complex	The Skate Complex consists of Alaska Skate, Aleutian Skate, Bering Skate, Big Skate, Butterfly Skate, Commander Skate, Deepsea Skate, Mud Skate, Okhotsk Skate, Roughshoulder Skate, Roughtail Skate, Whiteblotched Skate, and Whitebrow Skate. Alaska skate is assessed and is the indicator species for this complex.
NPFMC	Sablefish - Eastern Bering Sea / Aleutian Islands / Gulf of Alaska	Although Sablefish is managed separately in the Gulf of Alaska, Bering Sea, and Aleutian Islands, with separate overfishing levels, ABCs, and TACs based on the proportion of biomass in each respective region, separate assessments are not conducted for each of these three regions; the assessment is based on aggregated data from the Gulf of Alaska, Bering Sea, and Aleutian Islands regions. Therefore, it is not appropriate to list separate status determinations for these three regions.
NPFMC	Gulf of Alaska Blackspotted and Rougheye Rockfish Complex	Blackspotted and Rougheye Rockfish consists of Blackspotted Rockfish and Rougheye Rockfish. An assessment of the combined species provides the overfished determination, and the OFL is based on the combined-species assessment.
NPFMC	Gulf of Alaska Demersal Shelf Rockfish Complex	The Demersal Shelf Rockfish Complex consists of the following stocks: Canary Rockfish, China Rockfish, Copper Rockfish, Quillback Rockfish, Rosethorn Rockfish, Tiger Rockfish, and Yelloweye Rockfish in the Southeast Outside district only. The overfishing determination is based on the OFL, which is computed by using estimates of Yelloweye Rockfish and then increased by 10% to account for the remaining members of the complex.
NPFMC	Gulf of Alaska Shallow Water Flatfish Complex	The Shallow Water Flatfish Complex consists of the following stocks: Alaska Plaice, Butter Sole, C-O Sole, Curlfin Sole, English Sole, Northern Rock Sole, Pacific Sanddab, Petrale Sole, Sand Sole, Slender Sole, Rock Sole, Speckled Sanddab, Starry Flounder, and Yellowfin Sole. Northern Rock Sole and Rock Sole are the indicator species for this complex. The overfishing determination is based on the OFL, which is computed by using abundance estimates of the complex. A single, assemblage-wide OFL is specified, but overfishing was not defined for the "other" shallow-water flatfish stocks per se, because they are part of the overall shallow-water flatfish assemblage.
NPFMC	Gulf of Alaska Thornyhead Rockfish Complex	The Thornyhead Rockfish Complex consists of the following stocks: Longspine Thornyhead and Shortspine Thornyhead. The overfishing determination is based on the OFL, which is computed using abundance estimates of Shortspine Thornyhead.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table B. Endnotes for FSSI Stocks

Jurisdiction	Stock	Endnotes
PFMC	Pacific chub mackerel - Pacific Coast	The assessment for Pacific chub mackerel does not provide an estimate of Bmsy because stock size is largely driven by environmental factors; however, if stock size is at least 3 times the minimum stock size threshold (MSST), harvest is allowed and the stock size is regarded as well above target levels. The most recent stock assessment indicates chub mackerel is currently at least 3 times the MSST.
PFMC	Pacific sardine - Northern Subpopulation	The fishery for Pacific sardine has been closed since 2015. Although Bmsy is not estimated, the stock is below the minimum stock size threshold (overfished threshold).
PFMC	California Blue and Deacon Rockfish Complex	The stock assessment includes a combined assessment of both blue rockfish and deacon rockfish.
PFMC	Oregon Blue and Deacon Rockfish Complex	The stock assessment includes a combined assessment of both blue rockfish and deacon rockfish.
PFMC	Chinook salmon - California Central Valley: Sacramento River Fall	Sacramento River Fall Chinook was declared overfished in June 2018. Although the effective date of the rebuilding plan was December 28, 2020, status quo management measures were determined to satisfy the requirements of a rebuilding plan so the first year of the rebuilding plan is regarded as June 2019.
PFMC	Chinook salmon - Northern California Coast: Klamath River Fall	Klamath River Fall Chinook was declared overfished in June 2018. Although the effective date of the rebuilding plan was December 28, 2020, status quo management measures were determined to satisfy the requirements of a rebuilding plan so the first year of the rebuilding plan is regarded as June 2019.
SAFMC	Blueline tilefish - Southern Atlantic Coast	The most recent stock assessment (2017) provided information on stock status from Key West, FL to Cape Hatteras, NC. The stock assessment did not provide overfishing and overfished stock status information on the portion of the stock between Cape Hatteras and the NC/VA border and the status of this portion is unknown. The South Atlantic Fishery Management Council has management authority over this stock from Key West to the NC/VA border.
SAFMC	Gray triggerfish - Southern Atlantic Coast	This stock was assessed in 2016, but the results were too uncertain to be used for recommending overfishing or overfished stock status determinations.
SAFMC	Red porgy - Southern Atlantic Coast	Although the rebuilding target date has passed, rebuilding measures are still in place until a new rebuilding plan is developed.
WPFMC	American Samoa Bottomfish Multi-species Complex	This complex contains 11 species including one emperor: spotcheek emperor; one grouper: yellow-edged lyretail; one jack: black jack; and eight snappers: common bluestripe snapper, crimson jobfish, golden eye jobfish, green jobfish, flame snapper, oblique-banded snapper, ruby snapper, and rusty jobfish. The Western Pacific Fishery Management Council (WPFMC) was notified on February 10, 2020 that this stock complex is overfished. The WPFMC has two years from this date to implement a rebuilding plan for the American Samoa Bottomfish Multi-Species Complex.
WPFMC	Main Hawaiian Islands Deep 7 Bottomfish Multi-species Complex	This complex contains 7 species including one grouper: Hawaiian grouper and six snappers: crimson jobfish, flame snapper, oblique-banded snapper, lavender jobfish, ruby snapper, and rusty jobfish.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table B. Endnotes for FSSI Stocks

Jurisdiction	Stock	Endnotes
WPFMC	Guam Bottomfish Multi-species Complex	This complex contains 13 species including one emperor: spotcheek emperor; one grouper: yellow-edged lyretail; two jacks: black jack and giant trevally; and nine snappers: common bluestripe snapper, crimson jobfish, flame snapper, golden eye jobfish, goldflag jobfish, lavender jobfish, oblique-banded snapper, ruby snapper, and rusty jobfish. The Western Pacific Fishery Management Council (WPFMC) was notified on February 10, 2020 that this stock complex is overfished. The WPFMC has two years from this date to implement a rebuilding plan for the Guam Bottomfish Multi-Species Complex.
WPFMC	Northern Mariana Islands Bottomfish Multi-species Complex	This complex contains 13 species including one emperor: spotcheek emperor; one grouper: yellow-edged lyretail; two jacks: black jack and giant trevally; and nine snappers: common bluestripe snapper, crimson jobfish, flame snapper, golden eye jobfish, goldflag jobfish, lavender jobfish, oblique-banded snapper, ruby snapper, and rusty jobfish.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
Atlantic HMS	Bigeye tuna - Atlantic	A domestic rebuilding plan is in place for this stock. The United States continues to work with the International Commission for the Conservation of Atlantic Tunas to develop and implement an international rebuilding plan to rebuild the stock throughout its range. The United States catches only a small portion of total catches for this stock. There is currently not enough information to project when this stock is expected to rebuild.
Atlantic HMS	Blue marlin - Atlantic	Blue marlin has been in a domestic rebuilding plan since 2001. Prior to 2019, there was no projected timeline to rebuild. In 2019, a rebuilding timeline was added and this stock is now projected to rebuild by 2028. There is now an international rebuilding plan (developed through ICCAT) in place for this stock.
Atlantic HMS	Bluefin tuna - Western Atlantic	For the most recent assessment, completed in 2017, the previously-used approach of basing stock status information on two widely divergent stock recruitment scenarios was abandoned, given the lack of evidence to support one scenario over the other, and the inability to calculate biomass-based reference points apart from knowledge (or assumptions) about how future recruitment potential relates to spawning stock biomass. Instead, a fishing mortality rate-based approach was used to provide management advice. For 2018-2020, the stock will be managed under an interim conservation and management plan (including an annual Total Allowable Catch), which is responsive to the scientific advice while recognizing the need for a transition between the 20-year rebuilding program adopted in 1998 and a future approach to managing the stock that relies on management procedures, which ICCAT has recommended for bluefin tuna and other priority stocks to manage fisheries more effectively in the face of identified uncertainties.
Atlantic HMS	Gulf Smoothhound Complex	The species contained in this complex are smooth dogfish, Florida smoothhound, and Gulf smoothhound.
Atlantic HMS	Porbeagle - Northwestern Atlantic	A domestic rebuilding plan is in place for this stock. The United States continues to work with the International Commission for the Conservation of Atlantic Tunas to implement and monitor an international rebuilding plan to rebuild the stock throughout its range.
Atlantic HMS	Prohibited Species	Stocks that cannot be retained in commercial or recreational fisheries include Atlantic Angel Shark, Basking Shark, Bigeye Sand Tiger, Shark Bigeye Sixgill Shark, Bigeye Thresher Shark, Bignose Shark, Caribbean Reef Shark, Caribbean Sharpnose Shark, Galapagos Shark, Longfin Mako Shark, Narrowtooth Shark, Night Shark, Sand Tiger Shark, Sevengill Shark, Sixgill Shark, Smalltail Shark, Whale Shark, and White Shark.
Atlantic HMS	Sailfish - Western Atlantic	A domestic rebuilding plan is in place for this stock. The United States continues to work with the International Commission for the Conservation of Atlantic Tunas to develop and implement an international rebuilding plan to rebuild the stock throughout its range. The United States catches only a small portion of total catches for this stock. There is currently not enough information to project when this stock is expected to rebuild.
Atlantic HMS	Shortfin mako - North Atlantic	A domestic rebuilding plan is in place for this stock. The United States continues to work with the International Commission for the Conservation of Atlantic Tunas to develop and implement an international rebuilding plan to rebuild the stock throughout its range. The United States catches only a small portion of total catches for this stock. There is currently not enough information to project when this stock is expected to rebuild.
Atlantic HMS	White marlin - Atlantic	White marlin has been in a domestic rebuilding plan since 2001. In 2019, an international rebuilding plan developed through the International Commission for the Conservation of Atlantic Tunas was put in place for this stock. The United States catches only a small portion of total catches for this stock. There is currently not enough information to project when this stock is expected to rebuild.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
CFMC	Caribbean Aquarium Trade Plants and Invertebrates Species Complex	Caribbean Aquarium Trade Plants and Invertebrates Species Complex contains the following potentially harvested species: Sponges: Erect rope sponge, chicken liver sponge, Cynachirella alloclada , potato sponge, finger sponge, Myriastras spp., pink vase sponge, lavender rope sponge, Spinosella polycifera , S. vaginalis, Tethya crypta ; Coelenterates: Pale anemone, corkscrew anemone, giant pink-tipped anemone, knobby anemone, Lebrunia spp. staghorn anemone, sun anemone, Zoanthus spp. sea mat, Diacosoma spp. false coral, Florida false coral; Annelid Worms: Sabellastarte spp. tube worms, magnificent duster, Christmas tree worm; Mollusks: Lettuce sea slug, netted olive, flamingo tongue, Lima spp., fileclams, rough fileclam, Atlantic thorny oyster, Octopus spp. (except the Common octopus, O. vulgaris); Arthropods: Snapping shrimp, Paguristes spp. hermit crabs, red reef hermit, nimble spray crab, Lysmata spp. peppermint shrimp, anemone shrimp, Mithrax spp. clinging crabs, banded clinging crabs, green clinging crabs, yellowline arrow crabs, Periclimenes spp. cleaner shrimp, Gonodactylus spp., Lysiosquilla spp., banded shrimp, golden shrimp; Echinoderms: Swimming crinoid, Davidaster spp., Crinoids, Nemaster spp. Crinoids, Astropecten spp. sand stars, common comet star, comet star, cushion sea star, giant basket star, Ophiocoma spp. brittlestars, Ophioderma spp. brittlestars, ruby brittlestar, long-spined urchin, Echinometra spp. purple urchin, pencil urchin, Lytechinus spp. pin cushion urchin, sea egg, Holothuria spp. sea cucumbers, Tunicates-Subphylum Urochordata.
CFMC	Caribbean Aquarium Trade Reef Fish Species Complex	Caribbean Aquarium Trade Species Complex contains the following species: Creole wrasse, yellowhead wrasse, yellowcheek wrasse, clown wrasse, bluehead wrasse, peppermint basslet, fairy basslet, yellowtail damselfish, dusky damselfish, bicolor damselfish, threespot damselfish, beaugregory, foureye butterflyfish, longsnout butterflyfish, spotfin butterflyfish, banded butterflyfish, lantern bass, orangeback bass, tobaccofish, harlequin bass, chalk bass, yellowhead jawfish, dusky jawfish, pearly razorfish, green razorfish, chain moray, green moray, goldentail moray, neon goby, rusty goby, jackknife-fish, spotted drum, blue chromis, sunshinefish, sergeant major, conchfish, flamefish, redspotted hawkfish, frogfish, peacock flounder, Atlantic spadefish, sharpnose puffer, cherubfish, porcupinefish, flying gurnard, glasseye snapper, butter hamlet, rock beauty, goldspotted eel, redlip blenny, high-hat, greater soapfish, sand diver, Caribbean tonguefish, Seahorses, Pipefishes, Batfish, and Scorpionfish.
CFMC	Caribbean Groupers	Caribbean Groupers is composed of black grouper, misty grouper, red grouper, tiger grouper, yellowedge grouper, and yellowfin grouper; and coney, graysby, red hind, and rock hind. There is no indicator species for this unit. Grouper unit 4 had previously been listed as overfished, but all grouper stocks are now consolidated into Caribbean Groupers, except goliath grouper and Nassau grouper. The consolidation was the result of amendments to implement required Annual Catch Limit (ACL) provisions. The overfished status of the new grouper complex is unknown and these stocks have not yet been assessed. They remain under catch limits to prevent overfishing.
CFMC	Caribbean Parrotfishes Complex	Caribbean Parrotfishes is composed of blue parrotfish, midnight parrotfish, princess parrotfish, queen parrotfish, rainbow parrotfish, striped parrotfish, redband parrotfish, redtail parrotfish, redfin parrotfish, and stoplight parrotfish. There is no indicator species for this unit.
CFMC	Caribbean Snappers	Caribbean Snappers is composed of black snapper, blackfin snapper, cardinal snapper, dog snapper, gray snapper, lane snapper, mahogany snapper, mutton snapper, Queen snapper, silk snapper, vermilion snapper, and yellowtail snapper; and schoolmaster and wenchman. There is no indicator species for this unit.
CFMC	Caribbean Tilefishes Complex	Caribbean Tilefishes Complex is part of the Caribbean Reef Fish FMU and is composed of blackline tilefish and sand tilefish. There is no indicator species for this unit.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
CFMC	Puerto Rico Angelfishes Complex	Puerto Rico Angelfishes Complex is composed of queen angelfish, gray angelfish, and French angelfish. There is no indicator species for this unit.
CFMC	Puerto Rico Boxfishes Complex	Puerto Rico Boxfishes Complex is composed of honeycombed cowfish and scrawled cowfish; trunkfish, spotted trunkfish, and smooth trunkfish. There is no indicator species for this unit.
CFMC	Puerto Rico Goatfishes Complex	Puerto Rico Goatfishes Complex is composed of spotted goatfish and yellow goatfish. There is no indicator species for this unit.
CFMC	Puerto Rico Grunts Complex	Puerto Rico Grunts Complex is composed of white grunt, tomtate, blue striped grunt, French grunt, margate, and porkfish. There is no indicator species for this unit.
CFMC	Puerto Rico Jacks Complex	Puerto Rico Jacks Complex is composed of blue runner, greater amberjack, horse-eye jack, black jack, almaco jack, bar jack, and yellow jack. There is no indicator species for this unit.
CFMC	Puerto Rico Scups and Porgies Complex	Puerto Rico Porgies Complex is composed of jolthead porgy, sea bream, sheepshead porgy, and pluma. There is no indicator species for this unit.
CFMC	Puerto Rico Squirrelfishes Complex	Puerto Rico Squirrelfishes Complex is composed of black bar soldierfish, longspine squirrelfish, bigeye (<i>Priacanthus arenatus</i>), and squirrelfish. There is no indicator species for this unit.
CFMC	Puerto Rico Surgeonfishes Complex	Puerto Rico Surgeonfish Complex is composed of doctorfish, blue tang, and ocean surgeonfish. There is no indicator species for this unit.
CFMC	Puerto Rico Triggerfishes and Filefishes Complex	Puerto Rico Triggerfishes and Filefishes Complex is composed of ocean triggerfish, queen triggerfish, Sargassum triggerfish, scrawled filefish, whitespotted filefish, and black durgon. There is no indicator species for this unit.
CFMC	Puerto Rico Wrasses Complex	Puerto Rico Hogfish/Wrasses Complex is composed of hogfish, Spanish hogfish, and puddingwife. There is no indicator species for this unit.
CFMC	St. Croix Angelfishes Complex	St. Croix Angelfishes Complex is composed of queen angelfish, gray angelfish, and French angelfish. There is no indicator species for this unit.
CFMC	St. Croix Boxfishes Complex	St. Croix Boxfishes Complex is composed of honeycombed cowfish and scrawled cowfish; trunkfish, spotted trunkfish, and smooth trunkfish. There is no indicator species for this unit.
CFMC	St. Croix Goatfishes Complex	St. Croix Goatfishes Complex is composed of spotted goatfish and yellow goatfish. There is no indicator species for this unit.
CFMC	St. Croix Grunts Complex	St. Croix Grunts Complex is composed of white grunt, tomtate, blue striped grunt, French grunt, margate, and porkfish. There is no indicator species for this unit.
CFMC	St. Croix Jacks Complex	St. Croix Jacks Complex is composed of blue runner, greater amberjack, horse-eye jack, black jack, almaco jack, bar jack, and yellow jack. There is no indicator species for this unit.
CFMC	St. Croix Scups and Porgies Complex	St. Croix Porgies Complex is composed of jolthead porgy, sea bream, sheepshead porgy, and pluma. There is no indicator species for this unit.
CFMC	St. Croix Squirrelfishes Complex	St. Croix Squirrelfishes Complex is composed of black bar soldierfish, longspine squirrelfish, bigeye (<i>Priacanthus arenatus</i>), and squirrelfish. There is no indicator species for this unit.
CFMC	St. Croix Surgeonfishes Complex	St. Croix Surgeonfish Complex is composed of doctorfish, blue tang, and ocean surgeonfish. There is no indicator species for this unit.

CFMC	St. Thomas / St. John Squirrelfishes Complex	St. Thomas/St. John Squirrelfishes Complex is composed of black bar soldierfish, longspine squirrelfish, bigeye (Priacanthus arenatus), and squirrelfish. There is no indicator species for this unit.
CFMC	St. Thomas / St. John Surgeonfishes Complex	St. Thomas/St. John Surgeonfish Complex is composed of doctorfish, blue tang, and ocean surgeonfish. There is no indicator species for this unit.
CFMC	St. Thomas / St. John Triggerfishes and Filefishes Complex	St. Thomas/St. John Triggerfishes and Filefishes Complex is composed of ocean triggerfish, queen triggerfish, Sargassum triggerfish, scrawled filefish, whitespotted filefish, and black durgon. There is no indicator species for this unit.
CFMC	St. Thomas / St. John Wrasses Complex	St. Thomas/St. John Hogfish/Wrasses Complex is composed of hogfish, Spanish hogfish, and puddingwife. There is no indicator species for this unit.
GMFMC	Black corals (Antipatharia) - Gulf of Mexico	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
GMFMC	Fire corals (Milleporidae) - Gulf of Mexico	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
GMFMC	Hydrocorals (Stylasteridae) - Gulf of Mexico	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
GMFMC	Sea fans (Gorgonia spp.) - Gulf of Mexico	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
GMFMC	Stony corals (Scleractinia) - Gulf of Mexico	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
GMFMC	Gulf of Mexico Deep Water Grouper Complex	The Deep Water Grouper Complex contains snowy grouper, speckled hind, Warsaw grouper, and yellowedge grouper.
GMFMC	Gulf of Mexico Jacks Complex	The Jacks Complex contains Almaco jack, banded rudderfish, and lesser amberjack.
GMFMC	Gulf of Mexico Mid-Water Snapper Complex	The Mid-Water Snapper Complex contains blackfin snapper, Queen snapper, silk snapper, and wenchman.
GMFMC	Gulf of Mexico Shallow Water Grouper Complex	The Shallow Water Grouper Complex contains scamp, black grouper, yellowfin grouper, and yellowmouth grouper.
GMFMC	Gulf of Mexico Tilefishes Complex	The Gulf of Mexico Tilefishes Complex contains tilefish, blueline tilefish, and goldface tilefish.
NEFMC	Atlantic salmon - Gulf of Maine	Rebuilding of Atlantic salmon is being pursued under the Endangered Species Act. Atlantic salmon was listed as endangered under the ESA in December 2000.
NEFMC	Red deepsea crab - Northwestern Atlantic	In the most recent stock assessments (NEFSC 2006) the current MSY and BMSY estimates for red crabs were judged unreliable. The assessment results supported a determination of not subject to overfishing,, but could not provide adequate information to support an overfished determination.
NEFMC	Atlantic wolffish - Gulf of Maine / Georges Bank	Because the life history of Atlantic wolffish is not well understood, there is considerable uncertainty in the evaluation of stock projections and a rebuilding period or a rebuilding F for this species at this time.
NEFMC	Ocean pout - Northwestern Atlantic Coast	This is the second rebuilding plan. The first rebuilding plan was implemented in 2004 and targeted to rebuild by 2014, but the stock failed to rebuild under the first plan.
NEFMC	Red hake - Gulf of Maine / Northern Georges Bank	The status of Gulf of Maine / Northern Georges Bank red hake is based on the results of the stock assessment completed in 2017. An Area Swept Biomass assessment was conducted in 2020, but was not used to support overfishing or overfished stock status determinations.
NEFMC	Windowpane - Gulf of Maine / Georges Bank	The status of Gulf of Maine / Georges Bank windowpane is based on the results of the stock assessment completed in 2019. An Area Swept Biomass assessment was conducted in 2020, but was not used to support overfishing or overfished stock status determinations. The rebuilding plan for Gulf of Maine / Georges Bank windowpane was implemented in 2010 and the stock was targeted to rebuild by 2017, but the stock failed to rebuild. The rebuilding plan was revised and the new start date is July 18, 2019 and the stock is expected to rebuild by 2029 (10-year rebuilding plan).
NEFMC	Yellowtail flounder - Georges Bank	The rebuilding plan for Georges Bank yellowtail flounder was implemented in 2006 and the stock was targeted to rebuild by 2014 (8-year rebuilding plan), was later extended to rebuild by 2016 (10-year rebuilding plan), and was again extended to rebuild by 2032 (26-year rebuilding plan). The status of this stock is based on the Transboundary Resources Assessment Committee finalized in 2013, which was the last accepted assessment that supported stock status advice. Empirical assessments were conducted in 2017 and 2018, but were not used to support overfishing or overfished stock status determinations.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
NPFMC	Blue king crab - Pribilof Islands	Pribilof Islands blue king crab was previously in a rebuilding plan that started in 2004 and had a target end date of 2014. The new plan implemented January 1, 2015 does not specify a target rebuilding date because it is not known when the stock is expected to rebuild. The Pribilof Islands Habitat Conservation Zone (PIHCZ) has been closed to groundfish trawling since 1995 and beginning in 2015, there is a prohibition on directed cod pot fishing in the PIHCZ. The causes of the stock decline are thought to be predominantly due to environmental changes that inhibit blue king crab reproduction. For this stock to rebuild, the stock would likely require multiple years of above average recruitment and/or a change in environmental conditions to increase larval productivity around the Pribilof Islands.
NPFMC	Arctic cod - Arctic Management Area	There is no commercial fishing for this stock, including Alaska state waters and international fishing, so fishing mortality is expected to be zero.
NPFMC	Saffron cod - Arctic Management Area	There is no commercial fishing for this stock, including Alaska state waters and international fishing, so fishing mortality is expected to be zero.
NPFMC	Snow crab - Arctic Management Area	There is no commercial fishing for this stock, including Alaska state waters and international fishing, so fishing mortality is expected to be zero.
NPFMC	Bering Sea / Aleutian Islands Blackspotted and Rougheye Rockfish Complex	Blackspotted and Rougheye Rockfish consists of Blackspotted Rockfish and Rougheye Rockfish. An assessment of the combined species provides the overfished determination, and the OFL is based on the combined-species assessment.
NPFMC	Bering Sea / Aleutian Islands Octopus Complex	The Octopus Complex consists of Giant Pacific Octopus, Flapjack Devilfish, Pelagic Octopus, Smoothskin Octopus, Octopus Benthoctopus oregonensis, Octopus Graneledone boreopacifica, and Octopus Bathypolypus arcticus. The Giant Octopus is regarded as the indicator species for this complex.
NPFMC	Bering Sea / Aleutian Islands Other Flatfish Complex	The Other Flatfish Complex consists of the following stocks: Arctic Flounder, Butter Sole, Curlfin Sole, Deepsea Sole, Dover Sole, English Sole, Longhead Dab, Pacific Sanddab, Petrale Sole, Rex Sole, Roughscale Sole, Sakhalin Sole, Sand Sole, Slender Sole, and Starry Flounder. The overfishing determination is based on the OFL, which is computed by using abundance estimates of the complex.
NPFMC	Bering Sea / Aleutian Islands Other Rockfish Complex	The Other Rockfish Complex consists of the following stocks: Dusky Rockfish, Harlequin Rockfish, Redbanded Rockfish, Redstripe Rockfish, Sharpchin Rockfish, Shortspine Thornyhead, and Yelloweye Rockfish. The overfishing determination is based on the OFL, which is computed by using abundance estimates of the complex.
NPFMC	Bering Sea / Aleutian Islands Shark Complex	The Shark Complex consists of Pacific Sleeper Shark, Salmon Shark, and Spiny Dogfish.
NPFMC	Gulf of Alaska Deepwater Flatfish Complex	The Deep Water Flatfish Complex consists of the following stocks: Deepsea Sole, Dover Sole, and Greenland Turbot. Dover sole is the indicator species for determining the status of this stock complex.
NPFMC	Gulf of Alaska Octopus Complex	The Octopus Complex consists of Flapjack Devilfish, Giant Pacific Octopus, Pelagic Octopus, Red Octopus, Smoothskin Octopus, Vampire Squid, and North Pacific Bigeye Octopus. The Giant Octopus is regarded as the indicator species for this complex. There is no OFL specified for this complex. The TAC is set at an amount less than or equal to 5 percent of the combined TACs for the remainder of the groundfish fishery.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
NPFMC	Gulf of Alaska Other Rockfish Complex	The Other Rockfish Complex consists of the following stocks: Canary Rockfish, China Rockfish, Copper Rockfish, Quillback Rockfish, Rosethorn Rockfish, Tiger Rockfish, and Yelloweye Rockfish (demersal shelf rockfish); and Blackgill Rockfish, Bocaccio, Chilipepper, Darkblotched Rockfish, Greenstriped Rockfish, Harlequin Rockfish, Northern Rockfish, Pygmy Rockfish, Redbanded Rockfish, Redstripe Rockfish, Sharpchin Rockfish, Silvergray Rockfish, Splitnose Rockfish, Stripetail Rockfish, Vermilion Rockfish, Widow Rockfish, Yelloweye Rockfish, and Yellowmouth Rockfish in various districts in the Gulf of Alaska.
NPFMC	Gulf of Alaska Shark Complex	The Shark Complex consists of Pacific Sleeper Shark, Salmon Shark, and Spiny Dogfish.
NPFMC	Gulf of Alaska Skate Complex	The Skate Complex consists of the following stocks: Alaska Skate, Aleutian Skate, Bering Skate, Deepsea Skate, Roughshoulder Skate, Roughtail Skate, and Whiteblotched Skate. The overfishing determination is based on the combined abundance estimates of these species.
NPFMC	Alaska Coho Salmon Assemblage	The Alaska Coho Salmon Assemblage consists of coho salmon, sockeye salmon, pink salmon, and chum salmon throughout southeast Alaska. There are 3 indicator stocks of coho salmon that are used to determine the status of the assemblage; these indicator stocks are Auke Creek, Berners River, and Hugh Smith Lake.
PFMC	Minor Nearshore Rockfish North	Minor Nearshore Rockfish North contains the following stocks: black-and-yellow rockfish, blue rockfish, brown rockfish, calico rockfish, China rockfish, copper rockfish, gopher rockfish, grass rockfish, kelp rockfish, olive rockfish, quillback rockfish, and treefish. The management unit is North of 40°10 N lat.
PFMC	Minor Nearshore Rockfish South	Minor Nearshore Rockfish South contains the following stocks: Black-and-yellow rockfish, gopher rockfish, grass rockfish, kelp rockfish, blue rockfish, brown rockfish, calico rockfish, olive rockfish, quillback rockfish, and treefish. The management unit is South of 40°10 N lat.
PFMC	Minor Shelf Rockfish North	Minor Shelf Rockfish North contains the following stocks: bronzespotted rockfish, chameleon rockfish, chilipepper rockfish, dusky rockfish, dwarf-red rockfish, flag rockfish, freckled rockfish, greenblotched rockfish, greenspotted rockfish, greenstriped rockfish, halfbanded rockfish, harlequin rockfish, honeycomb rockfish, Mexican rockfish, pink rockfish, pinkrose rockfish, pygmy rockfish, redstripe rockfish, rosethorn rockfish, rosy rockfish, silvergray rockfish, speckled rockfish, squarespot rockfish, starry rockfish, stripetail rockfish, swordspine rockfish, tiger rockfish, vermilion rockfish, bocaccio, and cowcod. The management unit is North of 40°10 N lat.
PFMC	Minor Shelf Rockfish South	Minor Shelf Rockfish South contains the following stocks: Bronzespotted rockfish, chameleon rockfish, dusky rockfish, dwarf-red rockfish, flag rockfish, freckled rockfish, greenblotched rockfish, greenspotted rockfish, greenstriped rockfish, halfbanded rockfish, harlequin rockfish, honeycomb rockfish, Mexican rockfish, pink rockfish, pinkrose rockfish, pygmy rockfish, redstripe rockfish, rosethorn rockfish, rosy rockfish, silvergray rockfish, speckled rockfish, squarespot rockfish, starry rockfish, stripetail rockfish, swordspine rockfish, tiger rockfish, vermilion rockfish, and yellowtail rockfish. The management unit is South of 40°10 N lat.
PFMC	Minor Slope Rockfish North	Minor Slope Rockfish North contains the following stocks: Aurora rockfish, bank rockfish, blackgill rockfish, redbanded rockfish, roughey rockfish, sharpchin rockfish, shortraker rockfish, splitnose rockfish, and yellowmouth rockfish. The management unit is North of 40°10 N lat.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
PFMC	Minor Slope Rockfish South	Minor Slope Rockfish South contains the following stocks: Aurora rockfish, bank rockfish, blackgill rockfish, redbanded rockfish, rougheye rockfish, sharpchin rockfish, shortraker rockfish, yellowmouth rockfish, and Pacific ocean perch. The management unit is South of 40°10 N lat.
PFMC	Other Fish	Other Fish contains the following stocks: Kelp greenling and leopard shark.
PFMC	Other Flatfish	Other Flatfish contains the following stocks: Butter sole, curlfin sole, flathead sole, rex sole, rock sole, sand sole, and Pacific sanddab.
PFMC	Pacific Coast Blackspotted and Rougheye Rockfish Complex	Rougheye rockfish and blackspotted rockfish were assessed together to support the status of the combined stock complex.
PFMC	Pacific Coast Salmon - ESA and Hatchery Stocks	The Salmon FMP contains two exceptions to the application of overfishing and overfished criteria and subsequent Council actions for stocks or stock complexes with conservation objectives: (1) hatchery stocks, and (2) stocks listed under the ESA.
PFMC	Coho salmon - Oregon Production Index Area: Lower Columbia Natural	Oregon Coastal Natural (OCN) coho are managed subject to the provisions of Amendment 13 to the Salmon FMP. The southern stock complex is listed as a threatened species under the ESA as part of the Southern Oregon / Northern California Coasts Coho ESU (May 6, 1997), and the northern components, Oregon Coast coho, are also listed as threatened. The OCN stocks have met their management objectives in recent years.
PFMC	Coho salmon - Oregon Production Index Area: Oregon Coast Natural	Oregon Coastal Natural (OCN) coho are managed subject to the provisions of Amendment 13 to the Salmon FMP. The southern stock complex is listed as a threatened species under the ESA as part of the Southern Oregon / Northern California Coasts Coho ESU (May 6, 1997), and the northern components, Oregon Coast coho, are also listed as threatened. The OCN stocks have met their management objectives in recent years.
PFMC	Coho salmon - Puget Sound: Snohomish	The final rule implementing the rebuilding plan for this stock was effective March 15, 2021. Because measures already in place in fishing year 2018 were later approved as measures that would help rebuild the stock, 2018 is considered the first year of the rebuilding plan.
PFMC	Coho salmon - Washington Coast: Queets	The final rule implementing the rebuilding plan for this stock was effective March 15, 2021. Because measures already in place in fishing year 2018 were later approved as measures that would help rebuild the stock, 2018 is considered the first year of the rebuilding plan.
PFMC	Coho salmon - Washington Coast: Strait of Juan de Fuca	The final rule implementing the rebuilding plan for this stock was effective March 15, 2021. Because measures already in place in fishing year 2018 were later approved as measures that would help rebuild the stock, 2018 is considered the first year of the rebuilding plan.
PFMC	Pink salmon - Puget Sound	The PFMC manages these fisheries consistent with provisions of the Pacific Salmon Treaty. These stocks originate from either U.S. or Canadian waters and are managed as mixed stock fisheries.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
PFMC / WPFMC	Pacific bluefin tuna - Pacific	The PFMC and WPFMC were first notified on April 8, 2013 that this stock is overfished. Under section 304(i) of the Magnuson-Stevens Act, a domestic rebuilding plan will not be developed for this stock because the overfishing and overfished status is due to excessive international fishing pressure and current international measures in place will not end overfishing or rebuild the stock. However, NMFS and the Councils maintain domestic regulations that address the impact of U.S. fishing vessels, and are working with the State Department to reduce fishing and rebuild this stock. Internationally, the Western and Central Pacific Fisheries Commission (WCPFC) and the Inter-American Tropical Tuna Commission (IATTC) manage this stock. The most recent stock assessment was completed in 2016, but did not incorporate data from years in which more stringent catch restrictions have been in place for both U.S. commercial and recreational fisheries as well as for foreign fisheries. The next stock assessment is expected to be completed in 2018 and include data from 2015 and 2016, when more stringent catch restrictions were in place.
PFMC / WPFMC	Striped marlin - Western and Central North Pacific	NMFS first notified the PFMC and the WPFMC that the Western and Central North Pacific stock of striped marlin to be subject to overfishing and overfished on December 5, 2013. On June 1, 2016, NMFS determined the stock continues to be subject to overfishing and overfished. Internationally, the Western and Central Pacific Fisheries Commission (WCPFC) and the Inter-American Tropical Tuna Commission (IATTC) manage this stock. Under section 304(i) of the Magnuson-Stevens Act, a domestic rebuilding plan will not be developed for this stock because the overfishing and overfished status is due to excessive international fishing pressure and current international measures in place will not end overfishing or rebuild the stock. In lieu of a formal domestic rebuilding plan, NMFS will continue to work with the WPFMC and PFMC, and the State Department to determine if more effective management measures should be proposed to the WCPFC and IATTC for 2016 and beyond.
SAFMC	Black corals (Antipatharia) - Southern Atlantic Coast	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low. □
SAFMC	Fire corals (Milleporidae) - Southern Atlantic Coast	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
SAFMC	Hydrocorals (Stylasteridae) - Southern Atlantic Coast	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
SAFMC	Soft corals (Octocorallia) - Southern Atlantic Coast	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
SAFMC	Stony corals (Scleractinia) - Southern Atlantic Coast	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
SAFMC	Sargassum - Southern Atlantic Coast	On July 11, 2003, NMFS partially approved the FMP for this stock. Although one of the disapproved provisions included the MFMT, a component of the overfishing definition, an examination of the rate of harvest (currently zero), relative to the approved MSY level (100,000 mt), indicates that overfishing is not occurring. In addition, no directed fishery for this stock currently exists. This species has the capacity to increase its biomass through vegetative growth by as much as 10 percent per day, thus doubling its biomass every two weeks. Therefore, it is unlikely that this stock is overfished.
SAFMC	Nassau grouper - Southern Atlantic Coast / Gulf of Mexico	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is very low.
SAFMC	South Atlantic Deepwater Snapper-Grouper Complex	The Deepwater Snapper-Grouper Complex contains blackfin snapper, misty grouper, yellowedge grouper, Queen snapper, sand tilefish, and silk snapper.
SAFMC	South Atlantic Grunts Complex	The Grunts Complex contains margate, sailor's choice, tomtate, and white grunt.
SAFMC	South Atlantic Jacks Complex	The Jacks Complex contains Almaco jack, banded rudderfish, and lesser amberjack.
SAFMC	South Atlantic Porgy Complex	The Porgy Complex contains jolthead porgy, knobbed porgy, saucereye porgy, scup, and whitebone porgy.
SAFMC	South Atlantic Shallow Water Snapper-Grouper Complex	The Shallow Water Snapper-Grouper contains coney, graysby, red hind, rock hind, yellowfin grouper, and yellowmouth grouper.
SAFMC	South Atlantic Snappers Complex	The Snappers Complex contains Cubera snapper, gray snapper, and lane snapper.
SAFMC / GMFMC	Goliath grouper - Southern Atlantic Coast / Gulf of Mexico	Fishery in the EEZ and state waters is closed; therefore, fishing mortality is approaching zero.
WPFMC	180 Fathom Bank Precious Coral Complex	The 180 Fathom Bank Coral Complex contains: pink coral (<i>Pleurocorallium secundum</i>), red coral (<i>Hemicorallium laauense</i>), gold coral (<i>Kulamanamana haumeae</i>), and bamboo coral (<i>Acanella</i> sp.).
WPFMC	Au'au Bed Black Coral Complex	The Au'au Bed Black Coral Complex contains <i>Antipathes grandis</i> , <i>Antipathes griggi</i> , and <i>Myriopathes ulex</i> .
WPFMC	Brooks Bank Precious Coral Complex	The Brooks Bank Precious Coral Complex contains: pink coral (<i>Pleurocorallium secundum</i>), red coral (<i>Hemicorallium laauense</i>), gold coral (<i>Kulamanamana haumeae</i>), and bamboo coral (<i>Acanella</i> sp.).
WPFMC	Deepwater shrimps (<i>Heterocarpus</i> spp.) - Main Hawaiian Islands	Deepwater shrimps include shrimp in the family Pandalidae.

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
WPFMC	Hancock Seamount Groundfish Complex	This stock complex uses pelagic armorhead as the indicator species of a three-species seamount groundfish complex that includes raftfish and alfonso. Overfishing and overfished status determination criteria were approved in 2003 for the seamount groundfish stock complex. Due to the data poor nature of this stock complex, the overfished status determination was made using a data-poor method prior to 2003 and there is currently not enough information to conduct a stock assessment using the criteria approved in 2003. This stock complex does not have a formal rebuilding plan or time period for rebuilding because it cannot be predicted when the stock will rebuild. The fishery in the U.S. EEZ has been closed under sequential 6-year moratoria since the inception of the FMP in 1986. Effective Dec 2010, fishing for bottomfish and seamount groundfish at the Hancock Seamounts is prohibited until the stock is rebuilt - these measures are considered as a de facto rebuilding plan.
WPFMC	Hawaiian Archipelago Exploratory Area Precious Coral Complex	The Hawaii Archipelago Exploratory Area Precious Coral Complex contains: pink coral (<i>Pleurocorallium secundum</i>), red coral (<i>Hemicorallium laauense</i>), gold coral (<i>Kulamanamana haumea</i>), and bamboo coral (<i>Acanella</i> sp.).
WPFMC	Kaena Point Bed Precious Coral Complex	The Kaena Point Bed Coral Complex contains: pink coral (<i>Pleurocorallium secundum</i>), red coral (<i>Hemicorallium laauense</i>), gold coral (<i>Kulamanamana haumea</i>), and bamboo coral (<i>Acanella</i> sp.).
WPFMC	Keahole Bed Precious Coral Complex	The Keahole Bed Precious Coral Complex contains: pink coral (<i>Pleurocorallium secundum</i>), red coral (<i>Hemicorallium laauense</i>), gold coral (<i>Kulamanamana haumea</i>), and bamboo coral (<i>Acanella</i> sp.).
WPFMC	Makapu'u Bed Precious Corals Multi-species Complex	Makapu'u Bed Precious Corals Multi-species Complex contains: pink coral (<i>Pleurocorallium secundum</i>), red coral (<i>Hemicorallium laauense</i>), gold coral (<i>Kulamanamana haumea</i>), and bamboo coral (<i>Acanella</i> sp.).
WPFMC	Northwestern Hawaiian Islands Bottomfish Multi-species Complex	This complex contains 8 species including one grouper: Hawaiian grouper and six snappers: crimson jobfish, flame snapper, green jobfish, oblique-banded snapper, lavender jobfish, ruby snapper, and rusty jobfish.
WPFMC	Northwestern Hawaiian Islands Crustacean Complex	The Northwestern Hawaiian Islands Crustacean Complex include: <i>Ranina ranina</i> (spanner crab), and <i>Heterocarpus</i> spp. (deepwater shrimp and nylon shrimp). Harvest quota for lobster is set at zero for the commercial lobster fishery in Northwest Hawaiian Islands Marine National Monument.
WPFMC	Westpac Bed Refugium-Precious Corals Complex	Westpac Bed refugium- Precious Corals Complex contains: pink coral (<i>Pleurocorallium secundum</i>), red coral (<i>Hemicorallium laauense</i>), gold coral (<i>Kulamanamana haumea</i>), bamboo coral (<i>Acanella</i> sp.), and black coral (<i>Antipathes griggsi</i> , <i>Antipathes grandis</i> , <i>Myriopathes ulex</i>).

National Marine Fisheries Service - 2020 Status of U.S. Fisheries

Table D. Endnotes for Non-FSSI Stocks

Jurisdiction	Stock	Endnotes
WPFMC	Oceanic whitetip shark - Western and Central Pacific	NMFS notified the WPFMC (Council) on May 1, 2020 that this stock is subject to overfishing and is overfished. In addition to management efforts by NMFS and the Council, management of the oceanic whitetip shark in the WCPO is shared with the Western and Central Pacific Fisheries Commission. This stock meets the requirements under section 304(i) of the Magnuson-Stevens Act so a domestic rebuilding plan will not be developed for this stock because: (1) the overfishing and overfished status is due to excessive international fishing pressure; and (2) because it has not been determined that management measures adopted by the WCPFC will end overfishing and rebuild the stock. Consistent with Magnuson-Stevens Act section 304(i), the Council is required to: (1) Within one year, develop and submit recommendations to the Secretary of Commerce for domestic regulations to address the relative impact of fishing vessels of the United States on the WCPO oceanic whitetip shark stock, and (2) Develop and submit recommendations to the Secretary of State and to Congress for international actions that will end overfishing and rebuild the WCPO oceanic whitetip shark stock, taking into account the relative impact of vessels of other nations and vessels of the United States on the stock.
WPFMC	Pacific Other Tuna Relatives Complex	The management unit includes <i>Auxis</i> spp. (frigate mackerels), <i>Allothenus</i> spp. (slender tunas), and <i>Scomber</i> spp. (mackerels).
WPFMC	Western Pacific Squid Complex	The Squid Complex contains <i>Ommastrephes bartamii</i> (neon flying squid), <i>Thysanoteuthis rhombus</i> (diamondback squid), and <i>Sthenoteuthis oualaniensis</i> (purple flying squid.)
WPFMC	Pacific Remote Island Areas Black Precious Coral Complex	The Pacific Remote Islands Areas Black Precious Coral Complex contains <i>Antipathes dichotoma</i> , <i>Antipathes grandis</i> and <i>Antipathes ulex</i> .
WPFMC	Pacific Remote Island Areas Bottomfish Complex	The Pacific Remote Island Areas Bottomfish Complex contains an assemblage of 12 species, including jacks, snappers, emperors and groupers.
WPFMC	Pacific Remote Island Areas Coral Reef Ecosystem Multi-species Complex	The Pacific Island Remote Areas Coral Reef Ecosystem Multi-species Complex contains 54 "currently harvested coral reef taxa" and innumerable "potentially harvested coral reef taxa." The Pacific remote island areas (PRIA) are U.S. island possessions in the Pacific Ocean that include Palmyra Atoll, Kingman Reef, Jarvis Island, Baker Island, Howland Island, Johnston Atoll, Wake Island, and Midway Atoll. All reefs of the PRIA except Wake Island, which is under the jurisdiction of the Department of Defense, are National Wildlife Refuges. Fishing for coral reef-associated species is prohibited in all these areas except Palmyra Atoll, Johnston Atoll, Wake Island, and Midway Atoll.
WPFMC	Pacific Remote Island Areas Crustacean Complex	The Pacific Remote Island Areas Crustaceans include <i>Panulirus marginatus</i> (spiny lobster), <i>Panulirus penicillatus</i> (spiny lobster), Family Scyllaridae (slipper lobster), <i>Ranina ranina</i> (Kona crab), and <i>Heterocarpus</i> spp. (deepwater shrimp).
WPFMC	Pacific Remote Island Areas Exploratory Area Precious Coral Complex	The Pacific Remote Island Areas Exploratory Area Precious Coral Complex contains pink coral (<i>Corallium</i> spp.), gold coral (<i>Gerardia</i> spp. and <i>Narella</i> spp.) and bamboo coral (<i>Acanella</i> spp., <i>Calyptropora</i> spp. and <i>Lepidoloma</i>).

Table E. Ecosystem Component Species

Jurisdiction	FMP	Species contained in Ecosystem Component Group
MAFMC	Atlantic Mackerel, Squid and Butterfish; Atlantic Surfclam and Ocean Quahog; Bluefish; Summer Flounder, Scup and Black Sea Bass; and Tilefish	Anchovies, Argentines, Greeneyes, Halfbeaks, Herrings and Sardines, Lanternfishes, Pearlsides, Sand lances, Silversides, Cusk-eels, Atlantic Saury, Pelagic Mollusks, Copepods, Krill, Amphipods, and other species under one inch as adults.
PFMC	Coastal Pelagic Species, Pacific Coast Groundfish, U.S. West Coast Fisheries for Highly Migratory Species, and Pacific Coast Salmon	Shared EC species include: round herring, thread herring, Mesopelagic fishes including families: Myctophidae, Bathylagidae, Paralepididae, and Gonostomatidae, Pacific sand lance, Pacific saury, silversides, smelts, and pelagic squids including families: Cranchiidae, Gonatidae, Histioteuthidae, Octopoteuthidae, Ommastrephidae except Humboldt squid (<i>Dosidicus gigas</i>), Onychoteuthidae, and Thysanoteuthidae.
PFMC	Pacific Coast Groundfish	Aleutian skate, Bering skate, California skate, rougtail skate, all other endemic skates in the family Arhynchobatidae, Pacific grenadier, giant grenadier, all other endemic grenadiers in the family Arhynchobatidae, finescale codling, ratfish, and tope (soupfin shark).
PFMC	U.S. West Coast Fisheries for Highly Migratory Species	Bigeye thresher, common mola mola, escolar, lancetfishes, louvar, pelagic sting ray, pelagic thresher shark, and wahoo. Prohibited species include Great white shark, Basking shark, mega mouth shark, Pacific halibut, Pink salmon, Chinook salmon, Chum salmon, Sockeye salmon, and Coho salmon.
PFMC	Coastal Pelagic Species	Pacific herring and jacksmelt
NPFMC	Fish Resources of the Arctic Management Area	All finfish other than Arctic cod and saffron cod; all marine invertebrates other than snow crab (<i>C. opilio</i>); all other forms of marine animals and plant life.
NPFMC	Scallop Fishery off Alaska	Rock scallops and the <i>Chlamys</i> species
NPFMC	Groundfish of the Bering Sea and Aleutian Islands Management Area and Groundfish of the Gulf of Alaska	Prohibited Species: Pacific halibut, Pacific herring, Pacific salmon, Steelhead trout, King crab, and Tanner crab. Forage Fish Species: Osmeridae family (eulachon, capelin, and other smelts), Myctophidae family (lanternfishes), Bathylagidae family (deep-sea smelts), Ammodytidae family (Pacific sand lance), Trichodontidae family (Pacific sand fish), Pholidae family (gunnels), Stichaeidae family (pricklebacks, warbonnets, eelblennys, cockscombs, and shannys), Gonostomatidae family (bristlemouths, lightfishes, and anglemouths), and Order Euphausiacea (krill). Grenadiers: Pacific grenadier, Popeye grenadier, Giant grenadier. Squids: Chiroteuthidae family, Cranchiidae family (glass squid), Gonatidae family (armhook squid), Onychoteuthidae family (hooked squid), and Order Sepioidea (North Pacific bobtail squid). Sculpins: Cottidae family, Hemitriptidae family, Psychrolutidae family, and Rhamphocottidae family.
SAFMC	Snapper-Grouper Fishery of the South Atlantic Region	Bank sea bass, cottonwick, longspine porgy, ocean triggerfish, and rock sea bass
WPFMC	American Samoa Archipelago Ecosystem	Black Precious Coral Complex, Coral Reef Ecosystem Multi-species Complex, Exploratory Area Precious Coral Complex, deepwater shrimps (<i>Heterocarpus</i> spp.), slipper lobsters (<i>Scyllaridae</i>), spanner crab, and spiny lobsters (<i>Panulirus</i> spp.)
WPFMC	Hawaii Archipelago Ecosystem	Bigeye scad, Hawaiian Archipelago Coral Reef Ecosystem Multi-species Complex, mackerel scad, slipper lobsters (<i>Scyllaridae</i>), and spiny lobsters (<i>Panulirus</i> spp.).
